Digital Quality Control Report

Report # 16 | Date: 2026-07-08 | Inspector: pinak chauhan

PANEL DETAILS

Parameter	Value
Panel ID	PNL-2026-001
Panel Name	Main Distribution Panel (MDP-01)
Customer	Larsen & Toubro
Project	Plant Expansion Phase-II
Panel Type	MCC
Drawing No	DWG-2026-0045
Serial No	SN-00123
Inspection Date	2026-07-08

REMARKS

Multiple issues identified during inspection, including incorrect wire ferruling, loose terminal connections, missing danger labels, and paint damage on the enclosure. Panel is rejected and must undergo rework before re-inspection.

DEFECT PHOTOS

```

Code
Python Auto
1 class Solution(object):
2     def addTwoNumbers(self, l1, l2):
3         l1_result = int(''.join(map(str, l1)))
4         l2_result = int(''.join(map(str, l2)))
5         total = l1_result + l2_result
6         res = list(map(int, str(total)))
7         res.reverse()
8         return res

Saved Ln 4, Col 1

Testcase Test Result

Runtime Error

TypeError: argument 2 to map() must support iteration
l1_result = int(''.join(map(str, l1)))
Line 3 in addTwoNumbers (Solution.py)
ret = Solution().addTwoNumbers(param_1, param_2)
Line 42 in _driver (Solution.py)
_driver()
Line 56 in <module> (Solution.py)

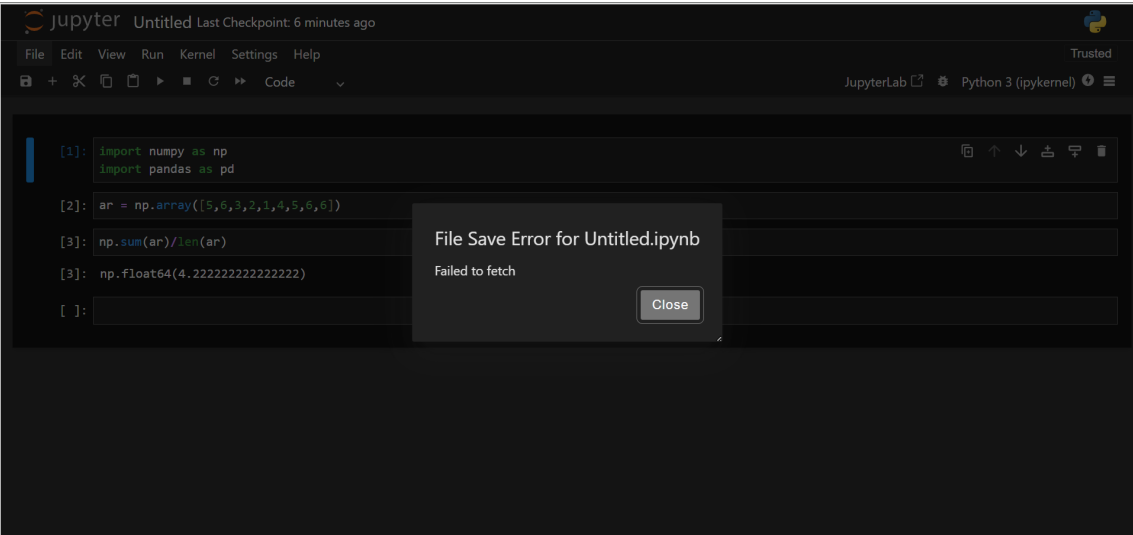

Stdout

```

```

TypeError: <__main__.ListNode object at 0x7f0b21f80290> is not
lid value for the expected return type ListNode
raise TypeError(str(ret) + " is not valid value for the expected
return type ListNode");
Line 82 in _driver (Solution.py)
_driver()
Line 90 in <module> (Solution.py)

```
